

WuXi Biology

A full spectrum of biology services and solutions, supporting stand-alone and integrated projects, from target discovery to candidate selection and into the clinic.

- Expertise in all major disease areas and target classes, enabling discovery for all modalities
- World class antiviral platform with an unequalled service capability and capacity in HBV, and other viral diseases
- A global leader in DNA Encoded Library (DEL) screening, with innovative business models
- CAP-certified pathology and FACS capabilities supporting clinical biomarker services
- The world's leading integrated, on-line, tumor model database

Services and Solutions

- | | |
|-----------------------------|---------------------------------|
| • High-throughput screening | • <i>In vivo</i> disease models |
| • DNA encoded libraries | • <i>In vitro</i> pharmacology |
| • Fragment based screening | • PDX and CDX models |
| • Biophysical assays | • Immuno-oncology |
| • X-ray crystallography | • Translational oncology |
| • CRISPR gene editing | • Cell panel screening |
| • Vector platform | • Tumor model database |
| • Clinical biomarkers | |

By the Numbers

More than

2,800 employees worldwide

9 in **3**
facilities countries

Entrusted by

20
of global top 20
pharmaceutical companies

1600+
customers worldwide

Enabling discovery for all modalities

-  Small Molecules
-  Biologics
-  Oligonucleotides | Peptides
-  Gene | Cell Therapies
-  Targeted Protein Degraders

Expertise in all major disease areas

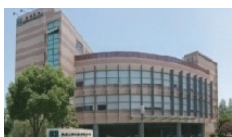

-  Oncology & Immunology
-  Cardiovascular Diseases
-  Metabolic Diseases
-  Digestive System
-  Central Nervous System
-  Respiratory Diseases
-  Infectious Diseases
-  Renal Disorders
-  Hepatology
-  Ophthalmology
