

Research Chemistry Services

WuXi AppTec's Research Chemistry Services (RCS) unit delivers synthetic and medicinal chemistry solutions to global pharma and biotech clients for the discovery of hits, leads, and preclinical candidates (PCCs) using our global platform.

Unique CRDMO Model

Why RCS?

FTE

(Full-time Equivalent)

- Deep Experience
- Proven Track Record
- Dedicated Team

FFS

(Fee-for-Service)

- Fast Delivery
- Flexible Service Mode
- High On-Time Rate

Productivity

RCS has a track record of exceeding client expectations for compound delivery rate, quality and purity.

Speed

Compounds are delivered within expected timelines and progress/results are communicated in a timely manner.

Flexibility

Multiple service choices/packages available.

Quality

RCS is a leader in innovation and implementation of new technologies and processes.

Reliability

Team collaborations yield the same high quality and systems across all sites, with 99%+ on-time delivery.

Specialty Chemistry

- Targeted Protein Degradar
- Antibody Drug Conjugate
- Targeted Covalent Inhibitor
- Lipid Chemistry

Technology Platform

- Flow Chemistry
- Photochemistry
- Fluorine Chemistry
- Reaction Conditions Screening

Accelerating PCC Finding

13.7 months

Average time to identify a PCC after collaborating with RCS

104* PCCs

Produced within RCS during 2024

* Based on feedback from clients

Contributing to Customer Success

60%

of small molecule deals (>\$100M) across the industry come from RCS partners in past 3 years**

** Statistical data for 2022-2024

90%

of RCS clients who raised funds in 2024 were already partners before fundraising

5 sites

supporting
global pharmaceutical
and biotech clients

1,300+

clients
around
the world

430,000+

compounds
delivered
in 2024
