

CRBN-DDB1

Ready to Go Assays • Customizable • Cost-Effective • Fast Turnaround Time

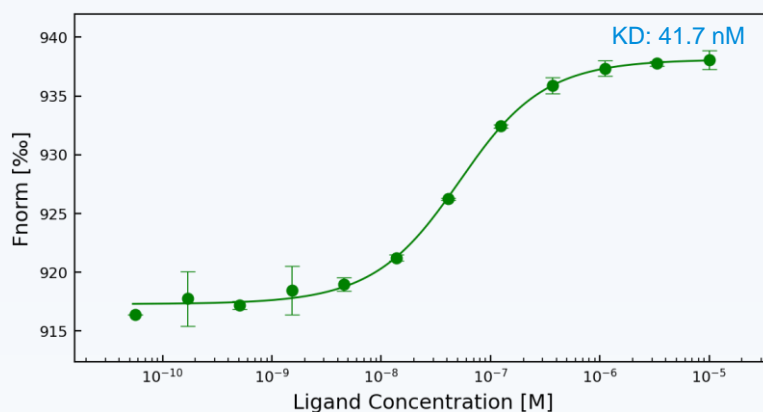

Ready-To-Go Biophysical Assays

- 2 weeks turnaround time
- Binary and ternary complex formation

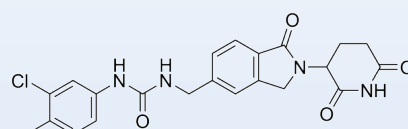

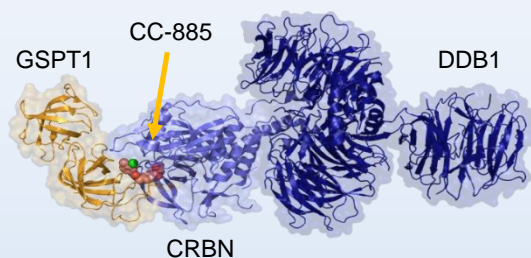

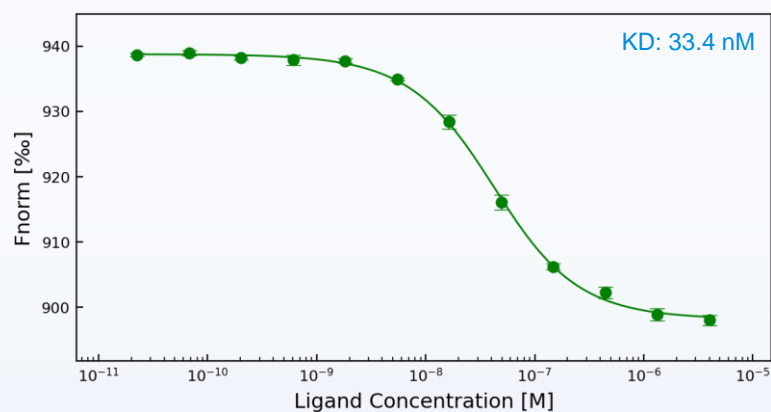

Labelfree TSA (nanoDSF)

Labeled MST

Ternary complex formation: CRBN-DDB1 + CC-885 vs. GSPT1

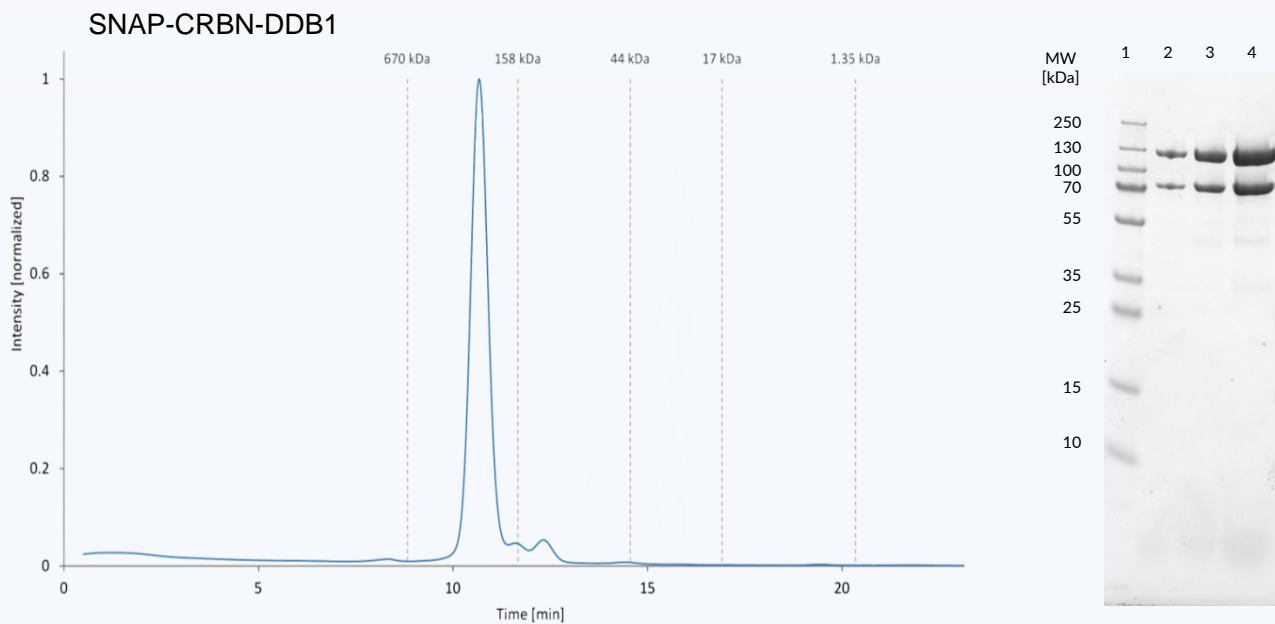

CC-885

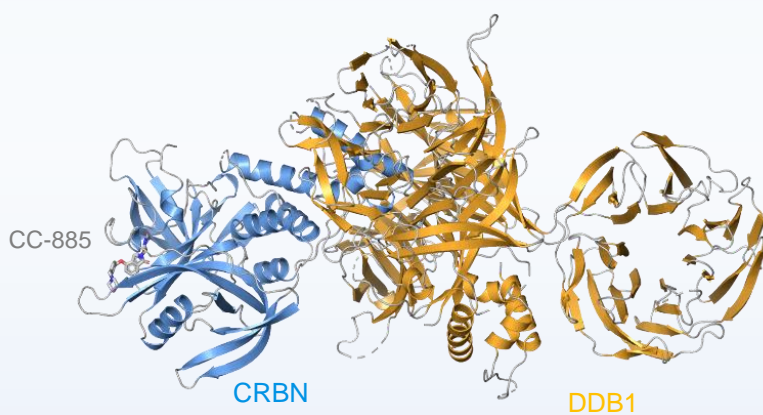

Prime Protein Production

High quality production of CRBN-DDB1 fully established

- Different tags available: SNAP, His, Avi
- Stocked protein available

X-ray Crystallography

CRBN-DDB1 bound to CC-885
(~3.5 Å)

Crystallization systems established

- Delivery of structures in 4 weeks
- 2 Months turnaround time
