

# PBMC Humanized Tumor Models for TCE Evaluation

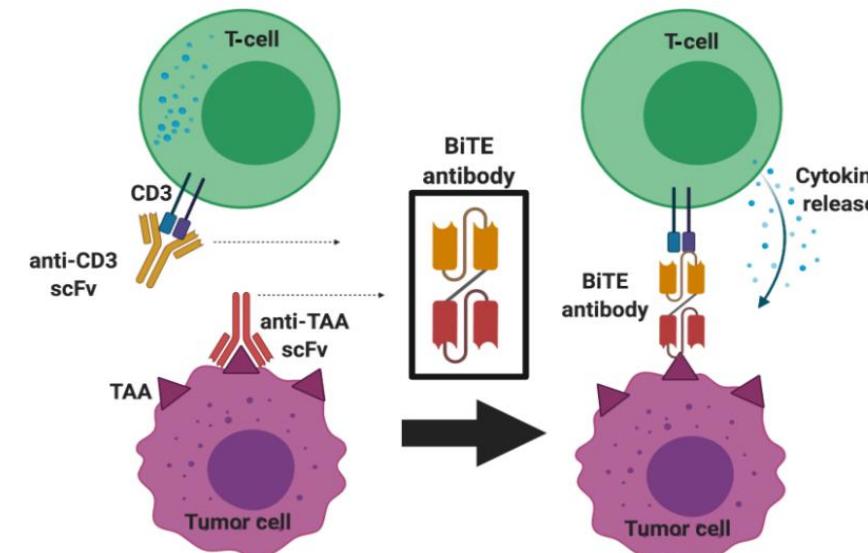

2025.09

# T-cell engagers (TCE)

## What is T-cell engagers (TCE)?

- Bispecific antibodies (tumor antigen x CD3)
- Form immune synapse between T cells and tumor cells
- MHC-independent recognition
- Strong cytotoxic activity at low antigen levels

*Anticancer Res. 2021 Mar;41(3):1123-1141.*

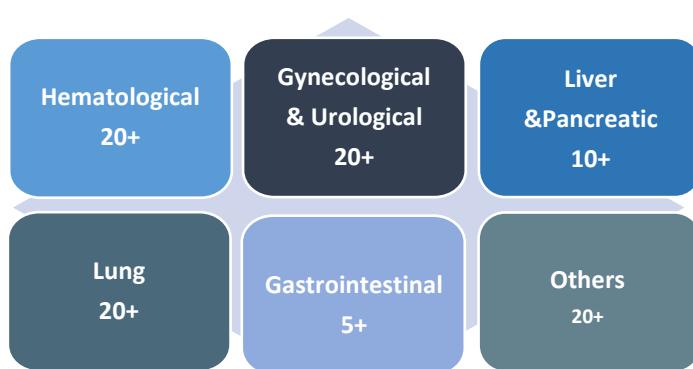

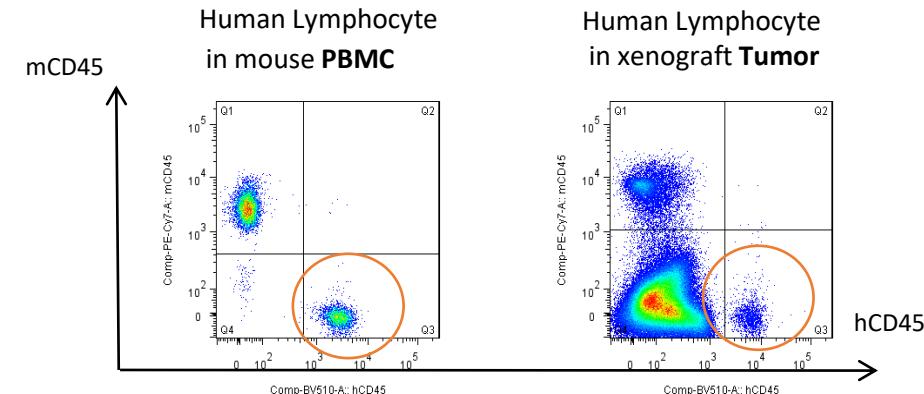

| Drug                             | Target     | Indication   |
|----------------------------------|------------|--|
| Blinatumomab (Blincyto)          | CD19 x CD3 | Relapsed/refractory B-cell precursor acute lymphoblastic leukemia (ALL). |
| Mosunetuzumab (Lunsumio)         | CD20 x CD3 | Relapsed/refractory follicular lymphoma.                                 |
| Epcoritamab (Epkinly / Tepkinly) | CD20 x CD3 | Relapsed/refractory diffuse large B-cell lymphoma (DLBCL).               |
| Teclistamab (Tecvayli)           | BCMA x CD3 | Relapsed/refractory multiple myeloma.                                    |
| Glofitamab (Columvi)             | CD20 x CD3 | Relapsed/refractory large B-cell lymphoma.                               |
| Tarlatamab (Imdelltra)           | DLL3 x CD3 | Extensive-stage small-cell lung cancer (ES-SCLC).                        |
| Linvoseltamab (Lynozyfic)        | BCMA x CD3 | Relapsed/refractory multiple myeloma.                                    |

# PBMC humanized tumor models

## What is PBMC humanized tumor model?

- T cell focused studies, quick and flexible
- 1~2 weeks for re-constitution
- 2~4 weeks of dosing & observation window
- 3 re-constitution methods for different study purposes
- Allowing for studies on 1900+ PDX/CDX models

## Successful human lymphocyte engraftment

**Well-validated Models in House**

**Well-validated Targets**

### Systemic (IP or IV) injection of hPBMC

- Clinical relevant
- IND and translational research

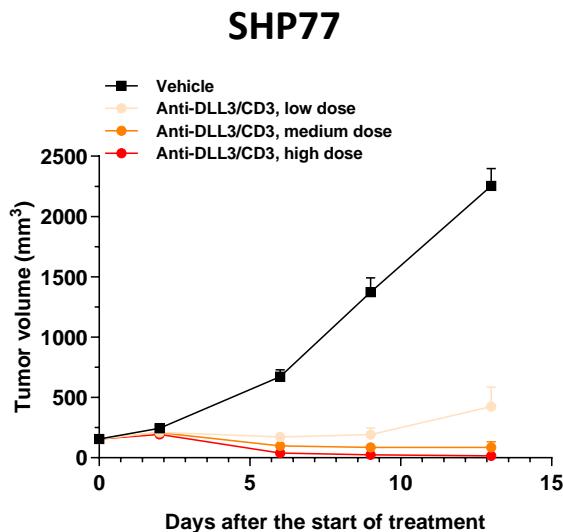

### Co-inoculation of hPBMC with tumor cells

- Straight-forward E/T interaction
- MoA and lead screening

# Showcase of TCE evaluation in PBMC humanized tumor models

## DLL3 x CD3

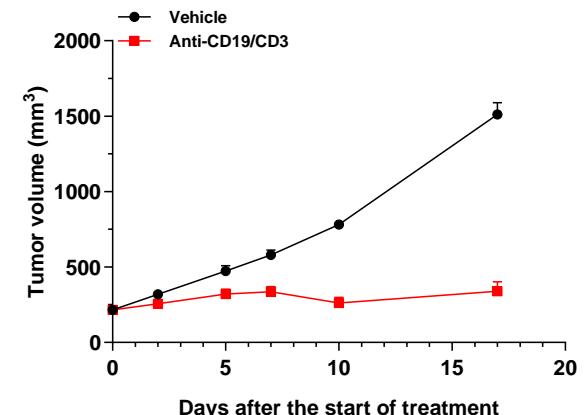

| Cancer type | Tumor model |
|-------------|-------------|
| Lung cancer | SHP77       |
|             | SHP77-luc   |
|             | NCI-H524    |
|             | NCI-H82     |
|             | NCI-H69     |

## CD19 x CD3

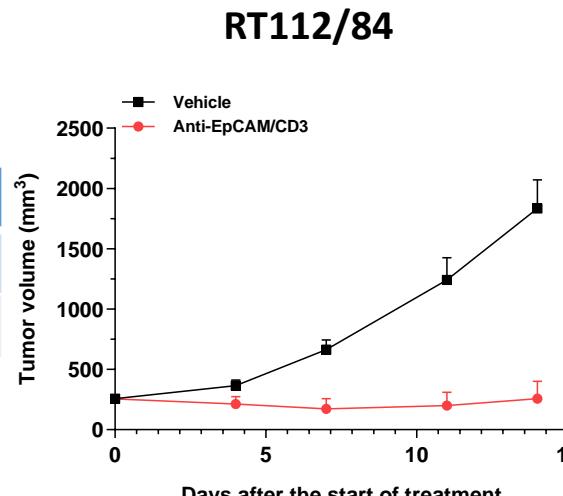

| Cancer type | Tumor model    |
|-------------|----------------|
| Lymphoma    | Raji           |
|             | Ramos          |
|             | Ibrutinib-R-LY |
|             | LY-24-0054     |
| Leukemia    | LY-24-0177     |
|             | NALM-6-luc     |

## Ibrutinib-R-LY-24-0041

## EpCAM x CD3

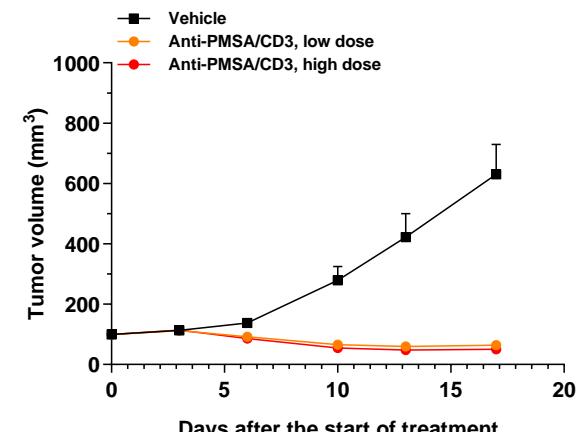

| Cancer type    | Tumor model |
|----------------|-------------|
| Lung cancer    | NCI-H1650   |
| Bladder cancer | RT112/84    |

## PSMA x CD3

| Cancer type     | Tumor model |
|-----------------|-------------|
| Prostate cancer | LNCap FGC   |
|                 | 22RV1       |

## LNCap FGC
